AGENDA

- Where are we at
- Issues
 - PfSense – Designed for homelab setups
 - Internal GUI – address to that in a browser
 - Headed vs Headless?
 - Look elsewhere than pfSense because of worry of not being able to deploy it
 - Options more configurable from the command line
 - IP fire
 - OpenWRT?
 -
- Assign issues?
 - OpenSIM vs Wazuh
- Prep for instructor meeting
 -
- Complete skeleton network deliverable
